- Dimensions (mm): 235 x 100 x 105

Description

The Socket & See TECCVIPCASE Voltage Indicator and Proving Unit Carry Case is a soft case designed to hold any Socket & See short form voltage indicator, including the VIPPRO, VIP100, VIP150 and also the Socket & See SP200 Proving Unit.

Formed of two separate compartments, the rear compartment provides protection for the voltage indicator, whilst the smaller front compartment houses the Socket & See SP200 Proving Unit. The proving unit section has a clear front with pre cut holes, enabling the user to access all functions of the proving unit without removing it from the case.

A neck strap and belt loop are included for easy transportation whilst on site.
